## SILICONE TECHNOLOGY

World's Largest Manufacturer of Silicone Urological Devices

## HYDROPHILIC TECHNOLOGY

Immediate Hydration with Less than 5ml of Water

advanced technologies to enhance patient outcomes

## ANTIMICROBIAL TECHNOLOGY

The Only Sustained Release Antimicrobial Urinary Catheters

## LIQUID ENCAPSULATION TECHNOLOGY

Innovative Fluid-Filled Designs Conform To Anatomical Contours

# StrataSI<sup>®</sup>

Silicone Foley Catheter  
with Comfort Layered Technology

Latex-Free

The StrataSI silicone Foley catheter is the most significant advancement in Foley catheter design in over 40 years. Made with our proprietary, Comfort Layered Technology, StrataSI is the first all-silicone Foley to offer your patients all of the advantages of silicone – without the stiffness.

## Ultra-soft outer layers

- Unparalleled softness for reduced urethral trauma
- Smooth, non-tacky surface for superior comfort while indwelling and upon removal

## Soft, pliable inner core

- Flexibility similar to latex for greater patient comfort
- Designed for easier insertion, removal, and handling

## Unique design

- Integrated, seamless balloon for a smooth transition from tip to shaft
- Shorter tip for reduced bladder irritation
- Eyelets positioned lower in bladder for more complete drainage

## 100% silicone

- Zero risk of latex-related allergic reactions
- Resistant to encrustation for reduced risk of catheter failure and pain upon removal
- Intrinsic biocompatibility for increased patient protection

# Anti-Infection StrataNF<sup>®</sup>

Silicone Foley Catheter  
with Comfort Layered Technology

Latex-Free

The StrataNF all-silicone Foley catheter is the most significant advancement in Foley catheter design in over 40 years. Made with our proprietary, Comfort Layered Technology, StrataNF is the first all-silicone Foley to offer your patients superior comfort and a clinically proven reduction in bacterial CAUTI.

## **Nitrofurazone matrixed on inner and outer surfaces**

- Clinically proven to reduce bacterial CAUTI
- NF catheters are the only Foley catheters to elute a non-systemic antibacterial agent
- Aligns with infection prevention best practices

## **Ultra-soft outer layers**

- Unparalleled softness for reduced urethral trauma
- Smooth, non-tacky surface for superior comfort while indwelling and upon removal

## **Soft, pliable inner core**

- Flexibility similar to latex for greater patient comfort
- Designed for easier insertion, removal, and handling

## **Unique design**

- Integrated, seamless balloon for smooth transition from tip to shaft
- Shorter tip for reduced bladder irritation
- Eyelets positioned lower in bladder for more complete drainage

## **Reduction of bacterial CAUTI**

- Rochester Medical NF Foley catheters are the only catheters with an indication for the reduction of bacterial CAUTI.

# ALL-SILICONE FOLEY CATHETER

Latex-Free

The Rochester Medical All-Silicone Foley Catheter is designed to enhance comfort and eliminate risks that may be associated with repeated exposure to latex devices. The clear silicone material enables visualization of drainage and helps minimize encrustation. The catheter provides improved drainage with a lumen area that is approximately 30% larger than latex catheters.

## Superior Silicone Construction

- Comfortable and toxin-free 100% silicone elastomer

## Latex-Free

- Eliminates potential risks that may be associated with repeated exposure to latex devices

## Smooth Integrated Balloon

- The transition between shaft and balloon is smooth and progressive for minimal trauma on insertion and removal

## Clear Silicone Shaft

- Enables inspection of the lumen.

## Large Diameter Drainage Lumen

- Improved drainage compared to latex Foley catheters

Magic<sup>3</sup> catheters are the first intermittent catheters designed from a unique composite of three distinct all-silicone layers. Each layer independently addresses an attribute required for comfortable, easy, and reliable intermittent catheterization.

The all-silicone design also eliminates allergen, toxin or disposal concerns that may be associated with latex and PVC catheters.

### **Ultra-soft outer layer to maximize comfort**

- The gentle outer layer is soft silicone with a nano-smooth surface. It provides reduced trauma and maximized comfort at the critical interface between the catheter and sensitive urethral tissue.

### **Firm middle layer for easy handling**

- The middle layer of proprietary silicone gives the catheter a precise level of firmness for quick, simple insertion. It makes the catheter easy to handle without sacrificing the comfort provided by the ultra-soft outer layer.

### **Pliable innermost layer for easy navigation**

- The soft innermost layer is made with an especially pliable silicone, that helps assure the catheter can navigate the urethra without unnecessary force. Additionally, this layer resists kinking and leverages the hydrophobic characteristics of silicone for efficient, reliable drainage.

The all-silicone Magic<sup>3</sup> catheter delivers superior performance, easy handling, and unsurpassed comfort and convenience.

Latex-Free

The 100% silicone *Personal Catheter* features an advanced silicone construction to provide comfortable, easy advancement while minimizing the potential for trauma.

The all-silicone design also eliminates allergen, toxin or disposal concerns that may be associated with latex and PVC catheters.

### **Superior Silicone Construction**

- Within the spectrum of materials commonly used to produce intermittent catheters, silicone is perfectly positioned between the stiffer PVC (poly vinyl chloride) and the extremely soft red rubber latex

### **The Most Compatible of Catheter Materials**

- Silicone eliminates latex allergens and, unlike PVC, is free of known toxins. Heat and cold don't affect silicone, so the *Personal Catheter* always maintains its shape

### **Tapered Tip with Comfort-Sized Eyes**

- A seamless, tapered tip and four comfort-sized drainage eyes help the catheter pass smoothly over sensitive urethral tissue. Offset drainage eyes optimize bladder drainage

Latex-Free

The *Personal Catheter* provides comfort, easy insertion, and is soft on delicate urethral tissue.

# MALE EXTERNAL CATHETERS

Latex-Free

Rochester Medical’s advanced catheter designs are helping more men improve their quality of life. Innovative materials, improved adhesives, and new product configurations make external catheters a comfortable reliable continence care choice. Our broad line of silicone male external catheters offer security and peace of mind for many men. Our variety of design configurations and sizes ensures men, including those who were previously hard to fit, will find an option that fits well and stays securely in place.

## Our all-silicone male external catheters provide

- Superior breathability for enhanced comfort and optimal skin integrity
- Soft silicone and uniform adhesive for secure placement
- Clear sheath for easy visual inspection of skin
- Kink-resistant design to ensure continuous urine flow

### UltraFlex® CE

Our UltraFlex catheter offers a built-in adhesive band in a length and placement found with traditional male external catheters. Its clear, breathable silicone design works well for a wide range of patients.

Size	30/box		100/box	
	REF	REF	REF	REF
Small 25mm	33301	33101		
Medium 29mm	33302	33102		
Intermediate 32mm	33303	33103		
Large 36mm	33304	33104		
X-Large 41mm	33305	33105		

### WIDEband® CE

The WideBand catheter provides 70% more adhesive area in its 3-inch adhesive width than traditional self-adhering designs. Combined with our patented forward placement of the adhesive, this design helps prevent accidental catheter detachment.

Size	30/box		100/box	
	REF	REF	REF	REF
Small 25mm	36301	36101		
Medium 29mm	36302	36102		
Intermediate 32mm	36303	36103		
Large 36mm	36304	36104		
X-Large 41mm	36305	36105		

### “POP-ON”® CE

The Pop-On catheter combines our forward placement adhesive technology with a 1.5-inch sheath. The maximum adhesive area on a short sheath provides men with a short or retracted penis a catheter for their specific needs.

Size	30/box		100/box	
	REF	REF	REF	REF
Small 25mm	32301	32101

\* 4 leg bags and 1 pair of standard straps

\*\* 1 leg bag, 1 extension tube and 1 pair of standard straps

## Leg Bag Straps

Available in three configurations, these machine washable and reusable straps feature a latex-free fabric. One size fits all.

Configuration	Quantity	REF
Standard <i>¾" elastic fabric with button closure designed to hold leg bag securely in place.</i>	12 pair	48160
Select <i>¾" elastic fabric with hook and loop closure provides security and ease of use.</i>	12 pair	48251
Premium <i>2" elastic fabric provides optimum comfort and security. Easy-to-use hook and loop secures leg bag to strap and strap to leg.</i>	12 each	48252

## Extension Tubes

Sterile, clear PVC tubing. Designed for secure connection of catheter to drainage bag.

Configuration	Quantity	REF
18 inch/45cm	12 each	46161

## Leg Bag Holder

Soft fabric holder offers a convenient and comfortable alternative to leg bag straps. Made of 80% polyester and 20% spandex for durability. Washable and reusable.

Configuration	Quantity	REF
Small 12-17 inch/30-45cm	12 each	47151
Medium 17-23 inch/45-58cm	12 each	47152
Large 23-28 inch/58-71cm	12 each	47153
X-Large 28-33 inch/71-84cm	12 each	47154

Latex-Free

The FemSoft Insert is a self-inserted, single-use, intra-urethral product that provides immediate control to women suffering from SUI. The FemSoft is easy-to-use, comfortable and discreet.

The insert consists of a narrow silicone tube entirely encased in a soft, thin, mineral oil-filled sleeve. The sleeve, also silicone, forms a balloon at the internal tip and a soft, oval-shaped external retainer at the opposite end. A disposable applicator is used to provide a means for insertions.
